

## NOORDELIJKE HOGESCHOOL LEEUWARDEN, THE NETHERLANDS 莱瓦顿北方学院

**Location:** Leeuwarden, The Netherlands

**Landscape Architects:** OKRA Landscape Architects bv

**Collaboration Architects:** Architecture Studio Herzberger, DHV bv

**Client:** NHL University

**Size:** 37,000 m<sup>2</sup>

**位置:** 荷兰莱瓦顿

**设计公司:** OKRA 景观设计事务所

**合作设计:** Herzberger 建筑师事务所, DHV 事务所

**客户:** 莱瓦顿北方学院

**面积:** 37 000 m<sup>2</sup>

## GREEN CARPET DESIGN

For the new location of the NHL University OKRA has made, in association with Architecture Studio Hertzberger, the design for the exterior space. This consists of a solid green carpet laid out as a counterpart to the imposing building. The green grass and trees continue under the building connecting the inner and outer worlds together. A spider-like network of routes and places creates an extension of the building from inside to outside.

## 植被的设计

Okra 事务所与 Hertzberger 建筑师事务所合作，为莱瓦顿北方学院的新址设计室外空间。该设计包括了这座气势宏伟的建筑物周围固定的绿色植被，绿色的草地和树木连接了建筑的外部 and 内部，道路和区块组成了一个蜘蛛形状的网络，打造了由建筑内部到外部的延伸。

## LANDSCAPE LAYOUT

The large building is situated in a relatively small location as part of the park area along the river EE in Leeuwarden. The landscape aims to connect the space under the building by means of green turf that seamlessly merges to the character of the park where many cherry and birch trees can be found planted in the grass. The tree mass and the ubiquitous grass creates the experience of the garden from everywhere within the transparent building. In one corner of the building is a natural pond introduced as a stepping-stone for bats between the park and the EE.

## 景观的布局

这座大楼坐落在相对较小的位置，是莱瓦顿 EE 河边公园的组成部分。该景观设计的目标在于利用绿草坪连接大楼下面的空间，并与公园的特色进行无缝连接，公园里的草地上种着许多樱树和桦树。树群和无所不在的草坪在通透的大楼范围内打造了花园式的体验。在大楼的一角，一个天然的池塘成为公园和 EE 河之间的过渡。
