A GREEN SPACE

For the old district Delft Poptahof is a newly structure plan developed. OKRA made a design for the central park area in the plan. A green space, but also offers many possibilities for the multi-ethnic neighborhood.

绿色空间

在代尔夫特 Poptahof 的旧区改造中，OKRA 完成了该区中心公园的设计，使之成为一个绿色空间，为这个多民族聚居区带来了无限的发展潜力。

BREAKING LINEAR PATTERN

The park is through a folded ground plane made into a curve in the Poptahof. The park breaks the linear pattern of the district. There is consistency in the park strip, while several using spots can appear. Through linking the network of the park and the district a large park area is created, so a logical way for a walk -"rondje Poptahof" with the dog is created.

打破线性模式

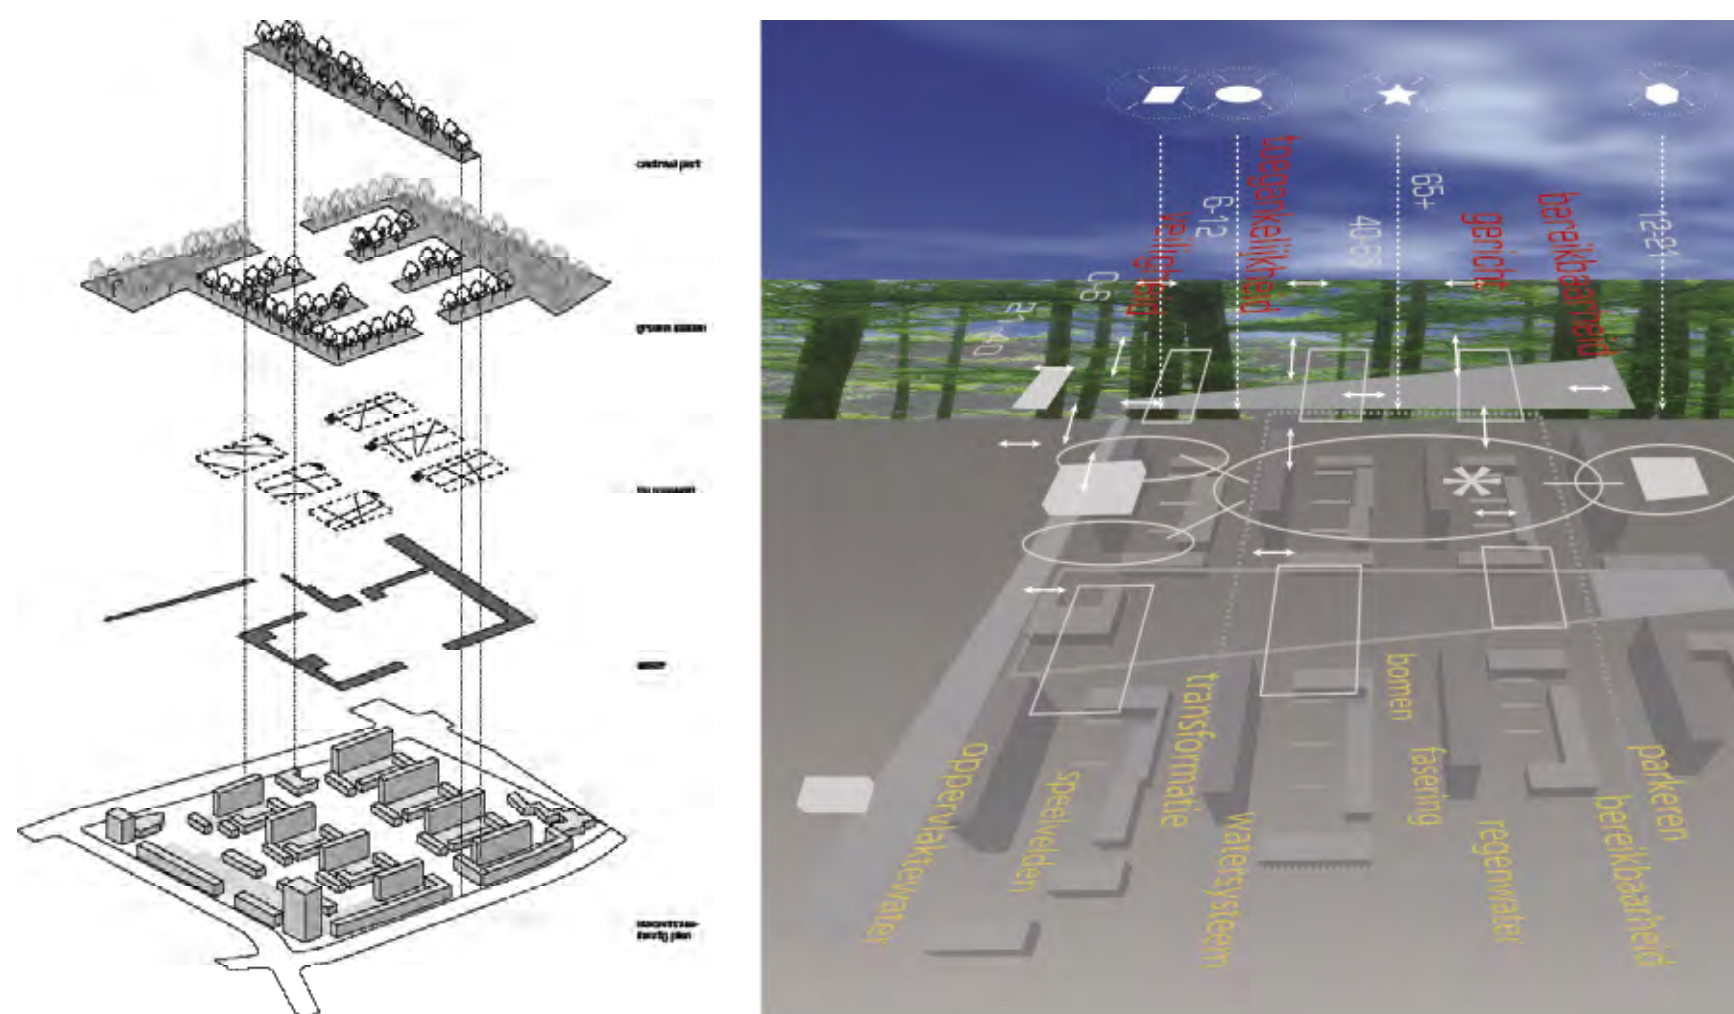

该公园位于 Poptahof 区，基地原来是一块折叠的平面，现通过规划设计，使之成为曲面。公园设计打破了该区的线性模式，在单调的长条上点缀了多个景观节点。并通过与该区的联系，形成了一大片公园区及网格似的散步道。

DIVERSITY

The park is focused on several core values: encounter, engagement, breadth and variety. The coexistence of different cultures must be experienced as a positive feature of Poptahof. This is reflected in the draft in a number of ingredients.

多样化设计

公园的设计强调四个关键词：交汇、融合、包容性和多样性。多种文化并存的状态成为 Poptahof 的优势，在设计中则表现为材料的多样化。

SPOTS AND THEMES

In the park are a number of areas situated, which need to be defined in the future. For these places the central focus point are engagement and encounter. The spots have a basic equipment of a crane and an electricity connection, a temporary seat edge and bottom shells. These places will get a final design based on residents' initiatives and thus involvement. There are also places to park users with recognizable themes such as a water laboratory (similar to the polder Poptahof), water playground, a market square at the mall, and a meeting point with the chestnuts.

节点与主题

公园里留有多区域，形成一个个景观节点，将在未来进一步完善。节点处设有起重机、电线接点、临时座边缘及底板。这些区域的设计将更多地遵从当地居民的意见和建议。另外，公园还设置了一系列的主题区，例如类似于 Poptahof 低地的水上实验室、水上运动场、购物广场和栗子林等，供人们聚会、休闲、娱乐。
